

Sydney/Sydney Eye Hospital

**Honorary
Professorial (Uveitis)
Fellowship**

Position Description

About

The Sydney Eye Hospital, established in 1882, is the largest eye hospital in the southern hemisphere. The hospital was originally the ophthalmic department of the old Sydney 'Infirmary' (Sydney Hospital), which was founded with the settlement of the Colony in 1788.

Sydney Hospital and Sydney Eye Hospital (SSEH) is now a major public hospital specialising in Ophthalmology, Hand Surgery, Drug & Alcohol and Sexual Health within the South Eastern Sydney Local Health District (SESLHD). Other specialty services include General Medicine and ENT. There is also a separate Eye Emergency Department as well as a General Emergency Department.

The Hospital has a long-standing reputation for treating the highest acuity and complex patient loads, attracting referrals on a state-wide and national basis.

The Hospital is a teaching hospital with an onsite ophthalmic academic unit for Sydney University and has academic associations with the University of NSW and the University of Technology, Sydney.

Honorary Professorial (Uveitis) Fellowship

Anyone can get uveitis but is it a relatively uncommon condition. In Australia, it affects around 20 people per 100,000 each year. Uveitis is the third leading cause of irreversible blindness worldwide.

The Professorial unit provides clinical services in the areas of inflammatory eye disease, medical retina, neuro-ophthalmology and genetically determined eye disease.

The selected Fellow participates in 30 outpatient clinics and 2 operating sessions per four-week cycle. This includes both complex uveitis cataract and glaucoma surgery.
